

```
public String saveModel(String name, String xmlText, List<PatternDTO> modelList) throws IOException {  
    //日期格式化  
    DateTimeFormatter formatter = DateTimeFormatter.ofPattern("yyyy-MM-dd hh:mm:ss");  
    //构建model对象  
    DDDModel model = DDDModel.builder().name(name).xmlText(xmlText).modelList(modelList)  
        .createTime(LocalDateTime.now().format(formatter))  
        .build();  
  
    //创建请求  
    IndexRequest request = new IndexRequest("dddmodels");  
    //规则 PUT /index/_doc/  
    request.timeout(TimeValue.timeValueSeconds(1));  
    //数据放入请求  
    request.source(JSON.toJSONString(model), XContentType.JSON);  
    //客户端发送请求，获取响应的结果  
    IndexResponse response = restHighLevelClient.index(request, RequestOptions.DEFAULT);  
    return response.status().toString();  
}
```
